一,插件下载:

https://github.com/rabbitmq/rabbitmq-delayed-message-exchange/releases 下载合适的版本。

我们的rabbitmq是3.86版本,插件选择: rabbitmq-delayed-message-exchange v3.8.x

二,我们的安装方法,rabbitmq 插件路径是: /usr/lib/rabbitmg/lib/rabbitmg server-3.8.6/plugins

上传上述插件到/usr/lib/rabbitmq/lib/rabbitmq_server-3.8.6/plugins 执行

cd /usr/lib/rabbitmq/lib/rabbitmq_server-3.8.6/plugins

rabbitmq-plugins enable rabbitmq_delayed_message_exchange

查看是否成功:

rabbitmq-plugins list

三,重启服务

systemctl restart rabbitmq-server
